## JUL 0 5 2007

## Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims:

Claims 1-16 (canceled).

Claim 17 (currently amended): The woven cloth, net or mesh according to claim 29, wherein each metal fiber thread has a larger diameter than the metal wire.

Claim 18 (currently amended): The woven cloth, net or mesh according to claim 29, wherein the metal wires are woven together with the metal fiber threads.

Claim 19 (currently amended): The woven cloth, net or mesh according to claim 18, wherein the metal wires constitute the warp, and the metal fiber threads constitute the weft of a the woven cloth.

Claim 20 (currently amended): The woven cloth, net or mesh according to claim 29, wherein each metal wire is a monofilament wire.

P.04

Claim 21 (currently amended): The woven cloth, net or mesh according to claim 29, wherein the metal wires form a smooth surface.

Claim 22 (currently amended): The woven cloth, not or mesh according to claim 29, further comprising a support layer comprising a plurality of metal wires.

Claim 23 (currently amended): The woven cloth, net or mesh according to claim 29, wherein a metal wire holds the woven cloth, net or mesh together.

Claim 24 (withdrawn): A method for producing a cloth, net or mesh, especially in accordance with claim 16, characterised in that a metal fibre thread (5 to 12) encased in a skin is woven together with a metal wire (2 to 4) to make a cloth, and the skin is removed subsequently.

Claim 25 (withdrawn): The method according to claim 24, characterised in that the skin is removed with a liquid.

P.05

Claim 26 (withdrawn): The method according to either of claim 24, characterised in that the cloth is welded to a solid body.

Claim 27 (withdrawn): The method according to any of claim 24, characterised in that stainless steel is used for the metal fibre thread (5 to 12) and for the metal wire (2 to 4).

Claim 28 (canceled).

Claim 29 (currently amended): A woven cloth, net or mesh made from metal having a weft and a warp comprising:

- (a) a plurality of metal wires; and
- (b) a plurality of metal fiber threads worked in between the metal wires, each metal fiber thread comprising a bundle of fibers, each fiber having a diameter less than 100  $\mu m$ , wherein a section through the metal fiber thread has more than 100 fibers.

Claim 30 (currently amended): The woven cloth, net or mesh according to claim 29, wherein each fiber has a diameter less than 30 µm and the section through the metal fiber thread has more than 500 fibers.

Claim 31 (currently amended): The woven cloth, net or mesh according to claim 22, wherein each wire in the support layer is a monofilament wire.

Claim 32 (currently amended): The woven cloth, net or mesh according to claim 23, wherein the metal wire is a monofilament wire.

Claim 33 (previously presented): A depth filtration sieve comprising a woven cloth, net or mesh according to claim 29.
